

CAHIER DES CHARGES / PORTFOLIO DOCUMENTATION

Leen Company API

Business backend

Backend services for services, projects, partners, marketers, invoices, price offers, payments, bank accounts, fixed assets, PDF documents and reports.

1. Contexte du projet

The backend supports a Saudi company platform. The included frontend dashboard is a portfolio/demo interface for explaining API areas and checking a backend URL.

2. Objectifs

- Business content
- Invoices and offers
- Payments
- PDF generation
- Docker deployment files

3. Acteurs

- Administrator
- Client
- Partner
- Marketer
- Accounting user

4. Interfaces et fonctions principales

Frontend API dashboard	Presents commercial, finance, document and deployment modules.
Service/project endpoints	Manage public services, projects and uploaded media.
Partner/marketer endpoints	Handle partners, referral/marketer flows and social links.
Finance endpoints	Invoices, price offers, payments, bank accounts and fixed assets.
Document generation	PDF invoices, price offers, reports and business card outputs.

5. Technologies utilisees

ASP.NET Core 8

Entity Framework Core

SQL Server

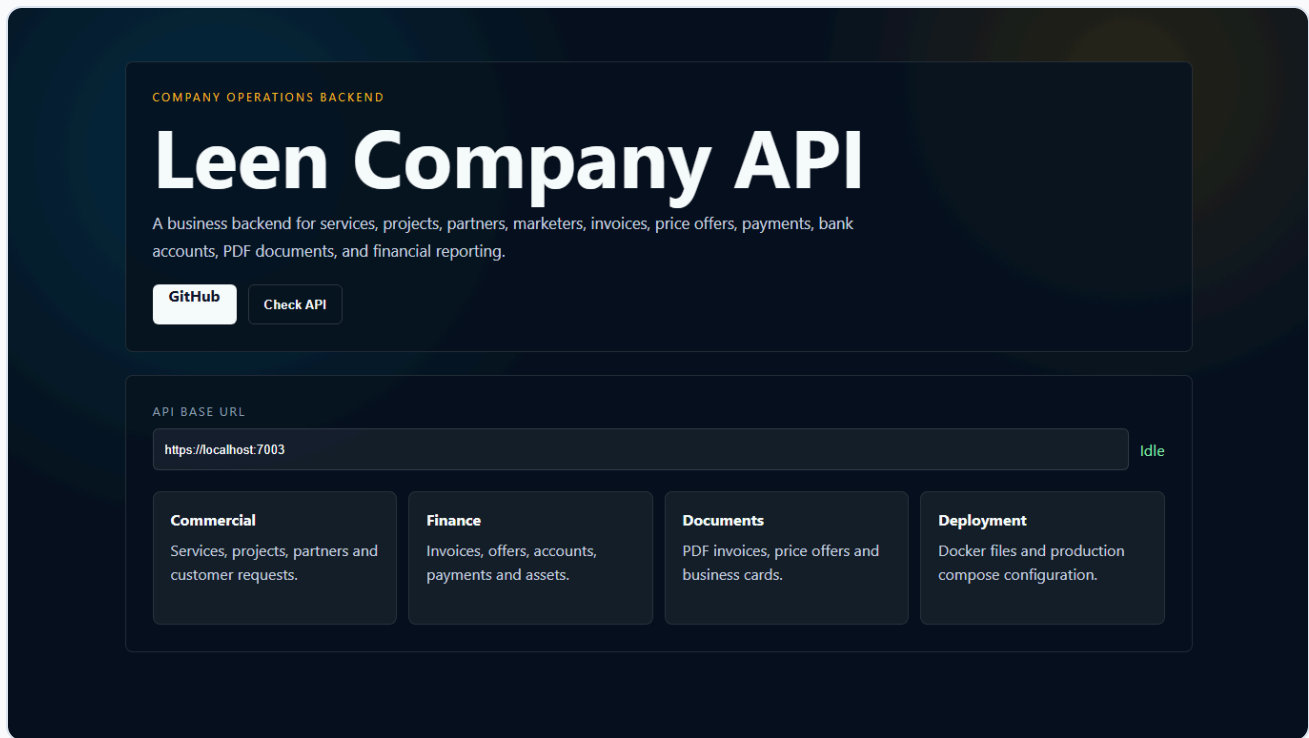

Docker

QuestPDF/iText

6. Travail en equipe / collaboration

Collaboration project: the repository is owned by another account, so the portfolio presents it as team work and avoids public links that visitors cannot open.

7. Capture d'ecran reelle

8. Liens

Repository: Private/team repository access

Demo: Static frontend prepared locally; Vercel deployment requires account login.
